About Us

Zenith Home Care, Inc., MISSION STATEMENT

Our mission is to provide professional and paraprofessional services to clients in their homes while assisting them to achieve the highest level of potential in their day to day self care activities. We are committed to providing high quality, multidisciplinary care by professionals who recognize the need for comprehensive assessment of needs from both the client and the professional.

PHILOSOPHY

The Agency's goals and services are based on two fundamental philosophical principles:

- *The belief in the innate worth of the aged and disabled individual, and the belief that each individual, regardless of age, color, creed, sex, national origin or handicap(s) is entitled to maximize his/her potential as a human being and as a member of society.*
- *It is the contention of this Agency that the aging process is a normal stage in the development of any individual and that chronic disease and disability are, to some degree, a part of the process. This Agency is dedicated to rehabilitating the aged and/or disabled individual in the confines of his/her residence, in order that they may maximize their contribution to their family and to society with minimum conflict. In accomplishing these goals, it is felt that the self-respect of the individual can and will be enhanced.*
